DETAILED ACTION

Response to Amendment

1. The response filed on 6/22/2005 has been considered.

2. No amendment to the claims has been filed.

3. Claims 1-13 are pending.

Response to Arguments

4. Applicant's arguments, see Remarks, filed 6/22/2005, with respect to the rejection(s) of claim(s) claims 1, 6 and 9 under 35 U.S.C. 102 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Oka Masaaki (JP Patent No. 05101161 A, date of publication: 04/23/1993).

Priority

5. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Japan on 10/14/1999. It is noted, however, that applicant has not filed a certified copy of the JP 11-293058 application as required by 35 U.S.C. 119(b).

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

- 6. Claims 9-13 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.
 - a. With regard to Claim 9, a recording medium stores a program, but does not comprise the recited steps. The examiner suggests "a computer program stored on a computer medium comprises instructional steps of:" for preamble.

Application/Control Number: 09/863,120 Page 3

Art Unit: 2621

b. Claims 10-13 are rejected as being dependent upon Claim 9.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 7. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Oka Masaaki (JP Patent No. 05101161 A, a copy of translation is attached herein).
 - a. Referring to Claim 1, Masaaki discloses an image apparatus (see figure 1) comprising: means for generating a line drawing image (an example of line drawing image is shown in figure 6A, which is a line drawing image of cloth) comprising line drawing image pieces (the horizontal lines and vertical lines are the claim line drawing image pieces); means for imparting vibrations to each of said line drawing image pieces to produce animation of the line drawing image (paragraph [0034], random-number vectors are added to new coordinates to stimulate fluctuation of the line drawling image of cloth, which deforms as wave-like vibration as shown in figure 6B); and means for drawing vibrating line drawing image pieces in a memory (the drawing of the image deformation occurs in memory 4, see paragraph [0005]).
 - b. Referring to Claim 2, Masaaki discloses wherein said line drawing image comprises a three-dimensional line drawing image (paragraph [0019]).
 - c. Referring to Claim 3, Masaaki discloses wherein said means for imparting vibrations generates vibrations to each of said line drawing image pieces by adding a random

Application/Control Number: 09/863,120

Art Unit: 2621

number to each coordinate of vertices of polygons forming each of said line drawing image pieces in a three dimensional space (see paragraphs [0024] and [0034]).

Page 4

- d. Referring to Claim 4, Masaaki discloses wherein said three-dimensional line drawing image drawn in said memory by said means for drawing is substantially linear image comprising vibrating line drawing image pieces horizontally extending substantially from the said to another said on a display screen (see figure 6B, the vertical lines are extended horizontally to another said).
- e. Referring to Claim 5, Masaaki discloses wherein a vibrating non-linear line drawing image is inserted in a part of said substantially linear image comprising vibrating line drawing image pieces (see figures 6C and 6D, some lines are substantially linear and some are not).
- f. With regard to Claim 6, see explanation in Claim 1.
- g. With regard to Claim 7, see explanation in Claim 2.
- h. With regard to Claim 8, see explanation in Claim 3.
- i. With regard to Claim 9, Masaaki discloses the apparatus is a computer-like device, which inherently contains a recording medium storing a program), the rest of limitations are addressed in Claim 1.
- j. With regard to Claim 10, see explanation of Claim 2.
- k. With regard to Claim 11, see explanation of Claim 3.
- 1. With regard to Claim 12, see explanation of Claim 4.
- m. With regard to Claim 13, see explanation of Claim 5.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure.

a. Jackson et al, U.S. Patent No. 5,561,745, see figure 2.

b. Yamaguchi Kentaro, JP Publication 2000-132709, see whole document. A copy of

translation is attached.

9. Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Tom Y. Lu whose telephone number is (571) 272-7393. The examiner can

normally be reached on 8:30AM-5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Joseph Mancuso can be reached on (571)-272-7695. The fax phone number for the organization

where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications may

be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR system,

see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system,

contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
